Foldable doors

Space efficiency redefined

Outside View

Innovative Design

1 Pressurized Foam with Melamine surface

To achieve the final panel outcome with 40mm thickness high density foam pressured at 350 kilograms per cubic meter.

2 Stainless Steel Handle

The Handle is crafted by using the highest grade stainless steel 304.

3 Stainless Steel Base

We utilized stainless steel as the base to provide the strongest and steady platform for the toilet partition.

4 Sliding Mechanism

The slide mechanism provides a soft and friction - free movement and feel.

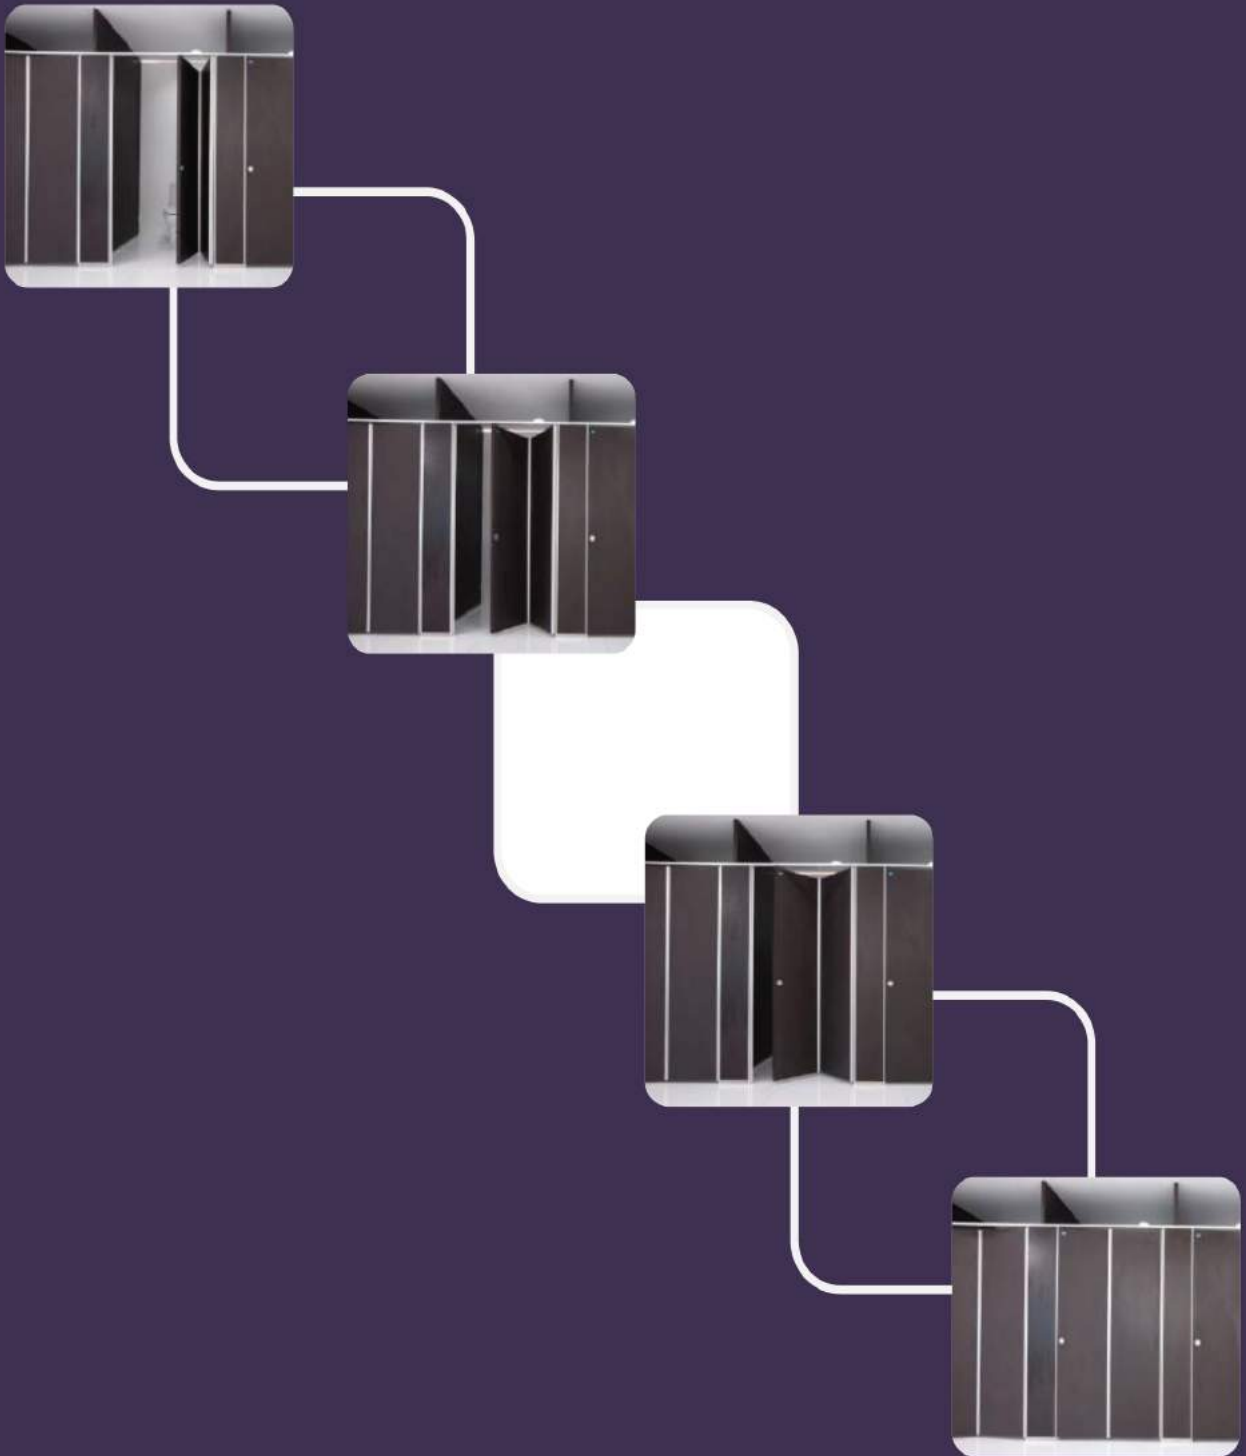

5 Soft Close mechanism

The mechanism hidden atop the panel ensures that safe and soft motion when closing the doors.
